Keep calm from rattling and noise.

The cushion by the built-in spring gently protects precious goods from vibration while driving.

Cushion caster protects precious goods

from rattling and damages.

- Selecting the built-in spring on demand can provide the cushioning effect in a wide range of applications.
- Suitable for use in precision equipment, medical equipment and semiconductor facilities.
- The vibration acceleration is about 1/10 of that of general-purpose products, and it is also useful on uneven surfaces such as asphalt and tile roads.

- Fitting types are plate type & threaded stem type.
- Wheel materials are rubber & urethane and wheel sizes are 100mm & 125mm.
- Ball bearing is installed to wheel bore, which provides smooth and stable travelling.

Wheels

【FR : Rubber】

- Ideal for environments requiring cushioning properties.
- Stable to run easily on uneven surfaces.
- Ball bearing is installed to wheel bore and the wheel revolving is very smooth.

【UZ : Urethane】

- Tread made of urethane that softens by heating and hardens by cooling and has non-marking property.
- Excellently resistant to oil, wearing and low temperature.
- Ball bearing is installed to wheel bore and the wheel revolving is very smooth.

Antistatic wheels

【Antistatic urethane】

- UZ wheel also has antistatic type that can prevent static damage and dust absorption.
 - The volume resistivity of antistatic wheel is [$1 \times 10^7 \Omega \sim 10^8 \Omega \text{ cm}$].
- Note) The allowable load should be about 60% of normal wheels. Please consult our sales office for details.
